

**Name:** glycerol-3-phosphate O-acyltransferase

**Function:** glycerol-3-phosphate O-acyltransferase belongs to the transferases family. This enzyme participates in glycerolipid metabolism and glycerophospholipid metabolism.

Information is from CDD.

**Source:** This protein doesn't have a Swissprot number in NCBI page. We did the BLAST against Swissprot database but the e-values were too high to be considerate.

Glycerol-3-phosphate O-acyltransferase is described on Brenda, in many different organisms, we used the number EC 2.3.1.15 to search for more information about this enzyme.
