

Name: long-chain-fatty-acid-CoA ligase

Function: Long-chain-fatty-acid-CoA belongs to ligase family. This protein activates the breakdown of complex fatty acids.

Source: This protein doesn't have a Swissprot number in NCBI page. We did the BLAST against Swissprot database but the e-values were too high to be considerate.

Long-chain-fatty-acid-CoA ligase is described on Brenda, in many different organisms, we used the number EC 6.2.1.3 to search for more information about this enzyme.
